JAVA PROGRAMMING PROJECT PRESENTATION

Project Title: [Password Vault and Credential Storage System]

Course: Java Programming Lab / Mini Project

Student Name & Roll No: [Roshini S.B & 25BCS249]

Department: Computer Science

Mentor / Guide: [Dharaneesh.S]

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

INTRODUCTION

Overview of the Password Vault System and its purpose

Problem background:

Users struggle to manage multiple passwords securely

Motivation:

Need for a secure and simple password storage system

Significance:

Helps users store and access credentials safely

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

OBJECTIVE

Main goals of the project:

- To design and implement a Java-based password vault
- To provide secure login using a master password
- To store and retrieve credentials efficiently
- To apply object-oriented programming concepts

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

PROBLEM STATEMENT

Current Issues:

- Users forget passwords frequently
- Passwords stored in unsafe ways
- High risk of security breaches

Solution:

Develop a secure password vault system using master password authentication

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

SYSTEM REQUIREMENTS

Hardware Requirements:

- Processor: Intel i3 or higher
- RAM: 4 GB minimum
- Storage: 500 MB free space

Software Requirements:

- OS: Windows / Linux
- Java JDK
- IDE: Eclipse / IntelliJ / VS Code

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

SYSTEM DESIGN

Structure and workflow of the system:

- User Registration (Master Password)
- Login Authentication
- Vault System (Store & Retrieve Data)
- Menu-driven Interface

Flow:

Login → Menu → Add/View Credentials → Exit

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

MODULE DESCRIPTION

Authentication Module:

– Handles registration and login

Vault Module:

– Stores and retrieves credentials

User Interface Module:

– Displays menu and accepts input

Exit Module:

– Safely terminates program

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

ALGORITHM / FLOWCHART

1. Start
2. Register master password
3. Login using password
4. Validate user
5. Display menu options
6. Perform selected operation
7. Repeat until exit
8. Stop

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

IMPLEMENTATION

Techniques used:

- Java Classes (AuthService, VaultService)
- Loops and conditional statements
- Scanner for user input
- ArrayList for storing credentials

Includes authentication and vault management logic

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

OUTPUT SCREENS

- Registration screen
- Login success / failure
- Add credential screen
- View stored credentials

(Insert screenshots here)

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

RESULTS & DISCUSSION

- System successfully stores credentials
- Login authentication works correctly
- Easy to use and efficient

Challenges:

- No encryption implemented
- No database storage

TECHNICAL TEAM

JAVA PROGRAMMING PROJECT PRESENTATION

CONCLUSION & FUTURE ENHANCEMENT

Conclusion:

- Project achieved its objective
- Demonstrates Java OOP concepts

Future Enhancements:

- Add encryption (AES)
- Connect to database (MySQL)
- Develop GUI (JavaFX/Swing)
- Add password generator
